

- Perfumed and coloured
- Shock resistant
- Water and high temperature resistant

The Sweet line offers up to 8 GB storage capacity and combines the useful and the pleasant with an innovative concept. Sweet is thus the antithesis of the sad flash drive that we all know. With its elegant design, its vivid colours, its fruited fragrances, it is decorative and functional and shakes up preconceived ideas on digital entertainment. But on top of all, unlike gadgets that uselessly encumber the market, Sweet does not forget that it is, in the first place, a flash storage drive: USB 2.0, Plug and Play, Mac and PC compatible. The drive is also secured via a password lock system. Its extremely convenient cap-fastener makes it impossible to lose it!!
